

**TECHNICAL DATA SHEET
ELASTIFICATOR**The identification code: E-E
Line: EXLAK**PRODUCT DESCRIPTION**

Additive for paints and varnishes used to increase elasticity of coating. Used mainly on elements made of plastic, which are exposed to frequent deformation which can cause cracks and chipping off the coating.

USAGE

- car body parts made of plastic, which are exposed to frequent deformation (eg.: bumpers)
- car body parts made of metal , which are exposed to strokes of stones (eg.: bonnet)

MIXING RATIO

Amount of additive	Type of medium
10 - 30%	ready-mix two-component primer with hardener
10 - 30%	ready-mix two-component varnish with hardener
10 - 30%	one-component varnish

STORAGE TIME AND CONDITIONS

Store in tightly closed containers, in a cool, dry place away from sources of fire and heat. Avoid exposure to sunlight. Expiration date: 12 months from date of manufacture - date on the top of container.

HEALTH AND SAFETY REGULATIONS

See Safety Data Sheet of the product.

SPECIFIC WEIGHT

About 0.9 g/cm³
